MASTER-00 - Master Plan Index

POS-DGFY - Global Location Switching | Plan v1.0 | Revision 2026-09-27

Field	Value
Project	POS-DGFY - Global Location Switching
Plan version	1.0
Section	MASTER-00 - Master Plan Index
Revision date	2026-09-27
Plan status	EXECUTION READY
Purpose	Authoritative map of the Location Switching plan package.
Dependencies	All PLAN-01 through PLAN-11 sections; requirements; business rules; ADRs; risks; verification; handoff.

Original objective

Implement a global POS Location Switching feature that safely affects item stock, Add Item, sales, reports, shifts, settings, vouchers, price lists, affiliates, and audit logs. Evaluate Shift-only versus sidebar placement, research established multi-branch POS patterns, recommend an approach, and define a complete implementation plan.

Planning depth and status

Field	Value
Planning depth	LEVEL 4 - Critical multi-tenant, financial, inventory, authorization, and migration change
Plan version	1.0
Revision date	2026-09-27
Plan status	EXECUTION READY
Current governed phase	Discovery and contract
Next eligible phase	Backend enforcement after discovery exit criteria

Recommended architecture

Use a visible global Current Location entry point, but route operating-location changes through the existing Shift-controlled atomic close/open flow. Keep operating, viewing, and queue scopes explicit and separate.

Section index

Section	Title	Status	Depends on
PLAN-01	Executive Summary	COMPLETE	Objective and research
PLAN-02	Problem and Current State	COMPLETE	PLAN-01
PLAN-03	Target Architecture and Data Model	COMPLETE	PLAN-02
PLAN-04	Scope, Requirements, and Business Rules	COMPLETE	PLAN-01 to PLAN-03
PLAN-05	Backend, Permissions, and Security	COMPLETE	PLAN-03 and PLAN-04
PLAN-06	Frontend UX and Cross-Module Behavior	COMPLETE	PLAN-03 to PLAN-05
PLAN-07	Migration and Backward Compatibility	COMPLETE	PLAN-03 to PLAN-06
PLAN-08	Testing, Verification, and Acceptance	COMPLETE	PLAN-04 to PLAN-07

Section	Title	Status	Depends on
PLAN-09	Rollout, Observability, and Recovery	COMPLETE	PLAN-07 and PLAN-08
PLAN-10	Risks, Dependencies, and ADRs	COMPLETE	PLAN-01 to PLAN-09
PLAN-11	Final Recommendation and Handoff	COMPLETE	PLAN-01 to PLAN-10

Requirement index

Family	Range	Primary sections
Functional	FR-001 to FR-008	PLAN-04, PLAN-06
Quality	NFR-001 to NFR-002	PLAN-04, PLAN-08
Security	SEC-001 to SEC-006	PLAN-04, PLAN-05, PLAN-08
Data	DATA-001 to DATA-002	PLAN-03, PLAN-04, PLAN-07
Operations	OPS-001	PLAN-04, PLAN-09
Migration	MIG-001	PLAN-04, PLAN-07
Business rules	BR-001 to BR-008	PLAN-04
Acceptance	AC-001 to AC-006	PLAN-04, PLAN-08, PLAN-11

ADR index

ADR	Decision
ADR-001	Global entry point with Shift-owned operating transition and separate viewing context.
ADR-002	Shared catalog identity with location-specific operational state.
ADR-003	Backend-derived scope with atomic and idempotent transition.
ADR-004	Pilot and feature-flag rollout with additive migration only.

Open questions and assumptions

- Confirm voucher, price-list, affiliate, and settings ownership and location eligibility.
- Confirm strict terminal behavior and destination-terminal enrollment policy.
- Confirm report semantics for one location versus all authorized locations.
- Confirm parked-sale handoff policy across branches.
- Preserve the current dirty checkout; use a clean implementation worktree.

Readiness decision

EXECUTION READY: The sections are complete and internally consistent, but Initial discovery and implementation-order execution follows the approved plan and prompt.
